DEPARTMENT OF THE AIR FORCE
OFFICE OF THE CHIEF OF STAFF
WASHINGTON, DC

MEMORANDUM FOR ALMAJCOM/FOA/DRU

OCT 13 2005

FROM: HQ USAF/CV
1670 Air Force Pentagon
Washington, DC 20330-1670

SUBJECT: Energy Conservation/Efficiency in Air Force Operations

The President asked all Americans to conserve energy in the aftermath of Hurricanes Katrina and Rita, and the associated impact to the Nation's oil and natural gas production and oil refinery capacity. The President directed that all federal agencies "review their existing operating and administrative processes and conservation programs and identify and implement ways to reduce overall fuel use." While the Office of the Secretary of Defense will provide an initial input on energy savings and efficiencies taken by the Services next week, a more detailed input to the White House is required.

Provide a detailed update on the actions taken, and results achieved in your command to respond to the energy conservation/efficiency actions outlined in Attachment 1. Further, describe any other actions to conserve energy (i.e., compressed work schedules or telecommuting efforts). This information is required NLT 30 Nov 05 to respond to the Presidential direction in Attachment 3.

Submit your responses to AF/IL, who will consolidate this input, and prepare a detailed Air Force response. Your staff may direct their questions to Major David Abruzzi, DSN 664-4220, commercial (703) 604-4220 or email David.Abruzzi@pentagon.af.mil.

JOHN D. W. CORLEY
General, USAF
Vice Chief of Staff
