

DEPARTMENT OF THE AIR FORCE

Workspace Anywhere with Hypori

Q4, 2024

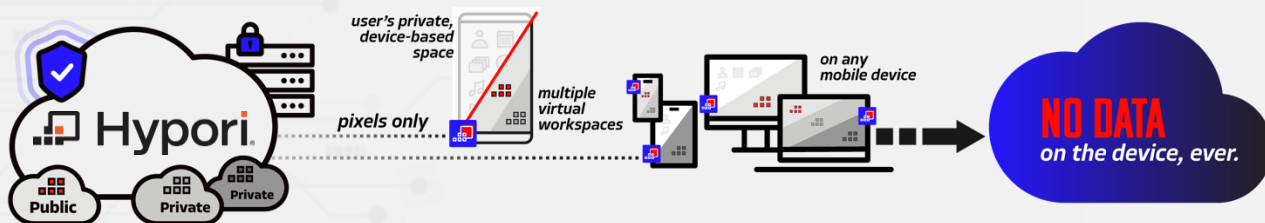

The DAF has partnered with the Army on Workspace Anywhere with Hypori. DAF personnel require secure digital access to government data and applications from their personal devices easily, at scale, and without risk of data loss and privacy breach. The user's device is not managed by the government and no data is stored on your personal device, ensuring total privacy for the end-user.

BENEFITS

- Game-changing remote capabilities designed to work together at the point of need to enable global connectivity, seamless collaboration, and the decision dominance required to deliver a modern, digital Air Force and Space Force.
- Supports DAF modernization efforts and a mobile, connected workforce.
- DAF mobile capabilities improve user experience by ensuring they have the flexibility, total user privacy, and zero-trust security to stay connected and work effectively from your preferred device anytime, anywhere.

TOP LINES

- **Mobile:** Secure access to NIPRNet, DAF365 apps like Outlook, Teams, OneDrive, etc., CAC-enabled websites, digitally sign documents, and virtual LMR capability.
- **Private:** DoD Red Team tested offering 100% separation of virtual workspace with absolute privacy. NO confiscation or remote wiping of the physical device in the event of spillage.
- **Secure:** Zero-trust protection on a virtual platform. No data is stored on the physical device. Rated for IL5 to include CUI. Send and receive encrypted emails.
- **Simple:** Carry one device to conduct official and personal business. No CAC needed to login.

CAPABILITY HIGHLIGHTS

- Stay connected with secure access to email, Teams, NIPRNet, CAC-enabled websites – from your own phone
- Open to all @us.af.mil, @spaceforce.mil, and @usspacecom.mil users at no initial cost to user or unit
- Supported on iOS, Android, and Windows devices (smartphones, tablets, and notebooks)
- One license per user (multiple devices allowed)
- Total privacy with no DAF access into personal data or activities on user's physical device
